

HEGEMONY

GOLD

WARS OF ANCIENT GREECE

HEGEMONY GOLD: WARS OF ANCIENT GREECE – A major upgrade to the award-winning historical strategy wargame *Hegemony: Philip of Macedon* from Longbow Games!

THREE HISTORICAL CAMPAIGNS – In-game pedia and 200+ historical objectives recreate the rise of the Macedonian empire and **two new campaigns** let you play as bitter enemies Athens and Sparta during the brutal Peloponnesian War.

NO BARRIERS, NO LIMITS – In the epic **new sandbox mode**, conquer the ancient Greek world as any one of the 26 factions ranging from the isolated island of Crete to the mighty Persian empire.

EXPERIENCE EVERY FACET OF WAR – Campaign across a continuous satellite-accurate map of ancient Greece encountering the full range of warfare from reconnaissance to raids to field battles to mountain blockades.

STARVE YOUR ENEMIES – Siege and starve the enemy by cutting their supply lines and burning their crops, all the while building and protecting your own supply network to support your expanding empire. With **new supply line upgrades**, use your extra resources to push supplies through a narrow mountain pass or feed a vast host in the remote Persian hills.

DEEPER TACTICS – An expanded tactical system rewards battlefield maneuvers like flanking, charging, camping, and foraging, and an all new recruits resource makes the results of each battle more significant than ever.

ZOOM SEAMLESSLY – Utilize Hegemony's trademark strategic zoom to transition smoothly from battlefield to the strategy map while maintaining complete control of your empire.

COERCE, INTIMIDATE, AND BEFRIEND – A brand **new diplomacy engine** tracks hostility and intimidation between factions allowing you to forge truces and alliances to aid your growing empire. Pay off larger factions to take pressure off your borders or position your army to intimidate weaker factions into offering you tribute.
